

**SIMS
METAL**

Leading Recycler of Metals and Electronics

SERVING THE MANUFACTURING, ENGINEERING, AND INDUSTRIAL
SECTORS SINCE 1917

SERVICE.
COMPLIANCE.
SUSTAINABILITY.
HEALTH + SAFETY.

ABOUT SIMS METAL

Sims Metal has been at the centre of the circular economy since 1917.

The company has grown to be one of the leading metal recyclers in the United Kingdom, United States, Australia, and New Zealand. Sims Metal is a division of Sims Limited, a world leading, publicly listed, metal and electronics recycling company with over 4,000 employees that operate from more than 280 facilities around the world, 28 of which are in the UK.

Sims Metal buys and processes ferrous and non-ferrous metal from businesses, other recyclers, and the general public. The business invests in state-of-the-art processing and recovery equipment that maximises metal recovery, diverting it from landfill.

2023 SUSTAINABILITY HIGHLIGHTS

The business is strongly committed to sustainability; it is constantly working on reducing emissions across its operations by using 100% renewable electricity. Its long-term goal is to become carbon neutral by 2030 and achieve net zero by 2050.

OUR SERVICES

Our specialist Industrial Services teams can offer complete end-to-end solutions for customers.

An example of our services include:

COLLECTION + PROCESSING

Appropriate logistics, storage and container, safe material handling solutions and recycling routes.

FREE SITE AUDITS

Detailed assessments of material types, handling requirements, service options and potential value recovery.

ACCOUNT MANAGEMENT AND PROJECT SUPPORT TEAMS

One point of contact – supported by regional project management teams.

NATIONAL COVERAGE

National network of depots and can service national or multi-site group contracts.

REPORTING AND COMPLIANCE

Aggregated reporting for loads, materials and total value recovery. Full Compliance reporting, covering Health, Safety, Environment and Sustainability data.

SECURE DESTRUCTION SERVICES

Secure destruction of any prototypes, proprietary technology or sensitive and classified materials (non-hazardous). Our in-house destruction capabilities can securely destroy any size of asset.

WE ALSO OFFER

- Skip and containers for scrap metal collection
- Material processing for the waste management sector
- Demolition and decommission projects
- End of Life Vehicles
- WEEE (SDS, LDA, and fridges) recovery
